Test Equipment Calibration

**T.E.C. \$690
plus GST
(Licensed for 1x
terminal / seat)**

Track and maintain calibration and service records for equipment/ assets Automatically flag when due for calibration or service

Examples

- Lifting equipment
- Machines
- Gauges
- Torque wrenches
- Micrometers
- Test equipment
- Welding machines
- Compressors
- Multimeters
- Lab equipment
- Chain blocks
- Hoists
- Vehicles
- Forklifts

Displays service and/or calibration due dates

- Record service number, manufacturer, model, location, tolerance and category
- Track, record and monitor service and/or calibration history
- Set different service and/or calibration intervals for each item (eg Service every 120 days but calibrate every 365 days)
- Report is generated at program startup showing items due for calibration and/or service
- Original calibration certificates can be scanned, or imported, into the program and stored against the item for audit purposes and future viewing & printing
- Generate a customer Test Cert which references a calibrated item from your equipment list

Note:

We can import data from existing Excel spreadsheets
